

Generally, user stories follow the format of As a ... I want to ... So that ...

### **User Story 1**

As a regular user

I want to be able to log in

So that I can view all of the ships that belong to me

### **Acceptance Criteria**

1. Given that I'm on the login page
2. When I type in a valid username
3. And I type in a valid password
4. And I click the login button
5. Then I should be able to see the landing page to view all ships that belong to me

### **Definition of Done:**

Here is an example of a definition of done that I thought of just now. You could have different definition of dones depending on your requirements.

1. All acceptance criteria should be met
2. All E2E tests utilizing selenium that implement the actions specified in the listed acceptance criteria should pass
3. All unit tests and integration tests that are relevant to that particular feature should have at least 80% test coverage
